## **Student Internship and Employment Opportunities**

Is your company looking to hire a student intern or a recent graduate?

Contact Dr. Johnny Golden at [johnny.l.golden@boeing.com](mailto:johnny.l.golden@boeing.com) with the pertinent details and we will email our SAMPE SOTEX student members, advising them of the opportunity.

## **Sponsorship**

South Texas Chapter of the Society for the Advancement of Materials and Process Engineering, SAMPE, is soliciting company sponsors for the 2025 / 2026 year. The South Texas Chapter of SAMPE is a growing society dedicated to advancing the fields of material and process engineering. SAMPE, through its South Texas Chapter, holds local meetings that provide opportunities for suppliers and the engineering community to get together. At each meeting, there is a social hour for members to establish new contacts and catch up on business, a meal, and a technical presentation or plant tour. These presentations and tours provide a learning and information exchange environment for meeting attendees.

Sponsorship donations help offset the costs of chapter activities, including establishing and providing student chapter leadership awards and offsetting some of the costs of students attending chapter meetings. The list of tangible sponsorship benefits will continue to be developed and currently includes recognition at events, websites, and chapter newsletters. Sponsorship will increase your company's visibility to local materials and process engineers in the industry. Sponsorship allows the cost per meeting to remain low, which helps bring in as many attendees as possible. If you would like to be a sponsor, please contact the treasurer, Rick Perkins, at 512-426-5728 or [rperkins@chemlogic.us](mailto:rperkins@chemlogic.us), or any officer of the South Texas SAMPE Chapter.
